Noel M Storan

Noel Storan has been working in the Civil Engineering and Contaminated Land Remediation Industries for 30 years. Noel's expertise is in managing the scientific and engineering inputs on a project to ensure that the required value added outcomes are achieved. Noel transforms contamination liabilities into land assets at the minimum cost.

Noel's career in the remediation of contaminated land, including asbestos impact soils, commenced in September 1992 when he worked on the early works clean-up of what would later become Sydney Olympic Park.

He was appointed as General Manager of a specialist Remediation Services business in 2001 and managed the growth of the business to a multimillion dollar turnover. In 2008, he was appointed as a Director of this business.

In May of 2010, Noel Storan established CARAS to provide specialist advice in Civil Construction, Remediation and Asbestos in Soils Projects.

Noel has presented at Industry Conferences and provided expert opinion on the costs of contaminated land remediation projects to the NSW Supreme Court.

SELECTED PROJECT EXPERIENCE

- Moorebank Intermodal Terminal Development
- PFAS Management for Moorebank Precinct
- Kiewa Landfill Remediation
- Bowen Water Treatment Works
- Sydney Olympic Park Development
- Wollongong Gas Works Remediation
- Boral Prospect Remediation and Commercial Development
- Barangaroo Development Precinct
- Wagga Wagga Gas Works Remediation
- Boral Greystanes Remediation and Urban Development
- Boral Moorebank Remediation and Urban Development
- Port Botany Terminal 3 Development
- Kurnell Desalination Plant Remediation
- Eastwood Brick pit Remediation
